Jay-ar D. Mesquiola
Manager
ProfDev Inc.
Santiago City, Isabela, Philippines

Dear Mr. Mesquiola,

I have read your job posting for the role of "Junior Full Stack Developer" at ProfDev Inc. and am interested in applying for this opportunity. I am in my third year of Bachelor of Science in Information Technology at Northeastern College and I expect to graduate in 2028. I would be interested in being able to share my developing technical skills with others and to learn how to work in a professional environment.

In my academic work I have learnt about website and mobile development. I worked on a laundry-service point-of-sale system using PHP, Flutter (Dart), and Supabase; a mobile attendance monitoring application and a food and recipe search application that uses a REST API. The projects have enabled me to practice real world solution development of application features, data manipulation and programming concepts.

I want to join ProfDev Inc. because I want to learn from the experienced developers and enhance my skills. I am looking forward to all of this as I continue to develop as a developer.

Thank you for your consideration of my application. I would love to explain to you about my educational background and the fact that I am eager to learn more, and how I can add value to your team.

Respectfully yours,

John Hans Dagiw-a Abaya
